{PROJECTS}

Mood Music | [GITHUB](#) + [WEBSITE](#)

JavaScript | React | Redux | Node | PostgreSQL

An app that provides mood-specific music. The user can submit a picture, taken via webcam, and a Spotify playlist will return that reflects their mood. My contributions include creating the backend and implementation of the Spotify API as well as designing the home page.

COFFEE FINDR | [GITHUB](#) + [WEBSITE](#)

JavaScript | HTML/CSS | React | Express

An app that helps you find good coffee in a given location. With a page dedicated to educating the user on different types of coffee. My personal contributions include implementing the JavaScript Map feature that allowed the user to pinpoint the location of a coffee shop they have clicked on. I had a major role in the CSS styling of our page, including the form on the front page.

ALCHEMY NETWORKR | [GITHUB](#) + [WEBSITE](#)

JavaScript | PUG | CSS | Node | Express | PostgreSQL

Content hub for alchemy students and grads where they can find projects from both current students and alum, as well as a place to see projects that could use contributions. Helped with the creation of the SQL database. Learned PUG and assisted with the implementation into our project. Completed in a one week sprint.

{EXPERIENCE}

FARM MANAGER

Highgrove Farms | May 2018 - February 2021

Checked 100 acre farmland for issues in need of attention and managed a crew of four, assigning them weekly tasks.

HARDWOOD FLOOR SPECIALIST

Good Ol Boy Floors | Aug 2015 - May 2018

Developed proficiency in hardwood floor refinishing and installation. Transformed hundreds of floors from eye sores to something magnificent.
